DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over Parsons in view of Wilbur. Figure 3 of Parsons discloses the basic claimed apparatus except for the use of a platen/anvil having a concave/convex relationship which could result in uneven or inefficient crushing. Wilbur solves this problem by disclosing similar apparatus including a convex/concave relationship. In order to produce even sized material in an efficient manner, it would have been obvious for one of ordinary skill in the art to modify Parsons by using a platen/anvil having a convex/concave relationship, taught to be desirable by Wilbur. The remaining limitations would then have been obvious design choices by one of ordinary skill in the art. For example, the use of a cover would have been obvious for several reasons such as decreased maintenance of inner parts and prevention of dust collection.

Response to Arguments

Applicant's arguments filed 1/29/08 concerning the above rejection have been fully considered but they are not persuasive. To modify Parsons, the only teaching of Wilbur being used is the concave/convex crushing arrangement of the platen and anvil. The examiner sees no reason why this modification cannot be made to ensure

appropriate crushing of a tablet. It is noted that the dependent claims have not been separately argued such that their patentability stands or falls with the parent claims.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
